Projects

Friend Tracker

[Live](#) | [Code](#)

A Social Media Friend Tracker app with a custom API backend that keeps track of and manages those relationships.

React | CSS | Firebase   

React Dictionary App

[Live](#) | [Code](#)

A Full-Stack React Dictionary app with an Express backend, Tailwind UI, and data from two APIs.

React | Tailwind | Firebase  

React Portfolio

[Live](#) | [Code](#)

Developed a professional portfolio website using React, styled with Tailwind CSS, and deployed it on Firebase. The website showcases my projects and achievements in a visually appealing format.

React | Tailwind | Firebase   

React Shopping Cart

[Live](#) | [Code](#)

A responsive e-commerce shopping cart app is built using React and utilizes custom hooks and local storage. It allows users to add products to their cart, adjust quantities, and remove items.

React | TypeScript | Material UI | Firebase

TS   

April 2012 - Present
